

# Pressure Sensor Trainer Kit

## Technical Specification

- On Board Pressure Sensor with 2PSI fs
- Output is Ratio metric to the Power Supply
- Facility to generate and monitor Pressure
- In Both Engineering Units mmHg as well as Psi Units
- Wide Temperature Compensation Range
- Based On 8051 microcontroller
- LED indicators On LCD Display
- Each section is having testing point .
- On board signal conditioner.

## Experiments

- To study The Fundamental/concept of pressure measurement .
- To Draw plot Between pressure Vs Volt .
