

Telemetry Raingauge Setup

Model no - AWS RN 01

Features

- Low power, ideal for remote sites
- Full instructions & Manufacturer's support
- Tipping bucket type rain gauge
- Optional wireless data ready on server
- Optional ready database on site

Data Logger

- Telemetry Raingauge Setup Data Logger feature latest technology items With facility for data recording in memory , into SD card. It has facility for inputs of up to 8 channel(4 channel for analog/Digital .Variable sampling rate to log data from interval of 600 sample/sec to 1 sample/week. This data logger come with LCD display , battery backup , portable and PC interface thru USB , serial .
- **Optional** : Ethernet interface for cloud connectivity .

Sensors Specification

- Type : Digital Rainfall Recorder (Telemetry)
- Power : Solar Powered
- Data Logger : 8 -Chanel Data Logger along with Data Shuttle
- Accessories : P C Interface Kit and Tripod Stand
- Mechanism : Tipping Bucket Type
- Sensing : Magnet & Reed Switch
- Resolution : 0.2 mm
- Accuracy : Better than + 5%
- Operating Temperature : - 4oC to + 50oC
- Capacity : Unlimited
- Sensitivity : O ne Tip (0.2 mm rain fall per pulse)
- Humidity : 0 - 100%
- Telemetry : GSM / GPRS based Telemetry with free Web Space for One Year
